

Procedures to file a request to JPO (Japan Patent Office) for Patent Prosecution Highway Pilot Program between JPO and NOIP (National Office of Intellectual Property)

Applicants can request accelerated examination by a prescribed procedure including submission of relevant documents on an application which is filed with JPO and satisfies the following requirements under the JPO-NOIP Patent Prosecution Highway pilot program based on the NOIP application.

When filing a request for the PPH pilot program, an applicant must submit a request form "The Explanation of Circumstances Concerning Accelerated Examination" based on the procedure prescribed in "the Guidelines of the Accelerated Examination and Appeal."¹ Under the PPH pilot program, an applicant is not required to fill in the section "2. the disclosure of prior arts and comparison between the claimed invention and prior art" in "The Explanation of Circumstances Concerning Accelerated Examination".

The Offices may terminate the PPH pilot program if the volume of PPH request exceeds manageable level, or for any other reason. Ex ante notice will be published if the PPH pilot program is terminated.

Upon request of the other Office, this document can be revised any time during the PPH pilot program if necessary.

The PPH pilot program will be in effect for three years commencing on April 1, 2016 and will end on March 31, 2019. However, the pilot program may be extended after a joint NOIP-JPO review and assessment of the program implementation.

1. Requirements

(a) The JPO application (including a PCT national phase application) is

- (i) an application which validly claims priority under the Paris Convention to the NOIP application(s) (examples are provided in ANNEX, figure A, B, C, F, G and H), or***
- (ii) a PCT national phase application without priority claim (examples are provided in ANNEX, figure I), or***
- (iii) an application which validly claims priority under the Paris Convention to the PCT application(s) without priority claim (examples are provided in ANNEX, figure J, K and L).***

The JPO application, which validly claims priority to multiple NOIP or direct PCT applications, or which is the divisional application validly based on the originally filed application that is included in (i) to (iii) above, is also eligible.

The pilot program is not applicable on the basis of NOIP 'utility solutions' applications.

¹ http://www.jpo.go.jp/torikumi/t_torikumi/souki/pdf/v3souki/guideline.pdf

(b) At least one corresponding application exists in NOIP and has one or more claims that are determined to be patentable/allowable by NOIP.

The corresponding application can be the application which forms the basis of the priority claim, an application which derived from the NOIP application which forms the basis of the priority claim (e.g. a divisional application of the NOIP application), or an NOIP national phase application of a PCT application.

Claims are “determined to be allowable/patentable” when the NOIP examiner clearly identifies the claims to be allowable/patentable in the latest office action, even if the application is not granted for patent yet. The office action includes at least one of the following:

- (i) Decision of grant a patent
- (ii) Notification of reasons for refusal
- (iii) Notification of reasons for amendment
- (iv) Decision for refusal
- (v) Decision of conversion to the ministries concerned
- (vi) Decision of Appeal

(c) All claims on file, as originally filed or as amended, for examination under the PPH must sufficiently correspond to one or more of those claims indicated as allowable in NOIP.

Claims are considered to "sufficiently correspond" where, accounting for differences due to translations and claim format, the claims in JPO are of the same or similar scope as the claims in NOIP, or the claims in JPO are narrower in scope than the claims in NOIP. In this regard, a claim that is narrower in scope occurs when an NOIP claim is amended to be further limited by an additional feature that is supported in the specification (description and/or claims).

A claim in JPO which introduces a new/different category of claims to those claims indicated as allowable in NOIP is not considered to sufficiently correspond. For example, where the NOIP claims only contain claims to a process of manufacturing a product, then the claims in JPO are not considered to sufficiently correspond if the JPO claims introduce product claims that are dependent on the corresponding process claims.

Any claims amended or added after the grant of the request for participation in the PPH pilot program need not to sufficiently correspond to the claims indicated as allowable in the NOIP application.

(d) JPO has not begun examination of the application at the time of request for the PPH (an example is provided in ANNEX, figure M).

(e) A “Request for Substantive Examination” must have been filed at JPO either at the time of the PPH request or previously.

2. Documents to be submitted

Documents (a) to (d) below must be submitted by attaching to “The Explanation of Circumstances Concerning Accelerated Examination”.

Note that even when it is not needed to submit documents below, the name of the documents must be listed in “The Explanation of Circumstances Concerning Accelerated Examination” (Please refer to the Example form for the detail).

(a) Copies of all office actions (which are relevant to substantial examination for patentability in NOIP), which were sent for the corresponding application by NOIP, and translations of them².

Either Japanese or English is acceptable as translation language.

(b) Copies of all claims determined to be patentable/allowable by NOIP, and translations of them².

Either Japanese or English is acceptable as translation language.

(c) Copies of references cited by NOIP examiner

If the references are patent documents, the applicant doesn't have to submit them because JPO usually possesses them. When JPO does not possess the patent document, the applicant has to submit the patent document at the examiner's request. Non-patent literature must always be submitted.

The translations of the references are unnecessary.

(d) Claim correspondence table

The applicant requesting PPH must submit a claim correspondence table, which indicates how all claims in the JPO application sufficiently correspond to the patentable/allowable claims in the NOIP application.

When claims are just literal translation, the applicant can just write down that “they are the same” in the table. When claims are not just literal translation, it is necessary to explain the sufficient correspondence of each claim based on the criteria 1. (c) (Please refer to the Example form).

When the applicant has already submitted above documents (a) to (d) to JPO through

² Machine translations will be admissible, but if it is impossible for the examiner to understand the outline of the translated office action or claims due to insufficient translation, the examiner can request the applicant to resubmit translations.

simultaneous or past procedures, the applicant may incorporate the documents by reference and does not have to attach them.

3. Example of “The Explanation of Circumstances Concerning Accelerated Examination” for filing request an accelerated examination under the PPH pilot program

(1) Circumstances

When an applicant files a request for an accelerated examination under the PPH pilot program to JPO, an applicant must submit a request form “The Explanation of Circumstances Concerning Accelerated Examination” based on the procedure prescribed in “the Guidelines of the Accelerated Examination and Appeal”³.

The applicant must indicate that the application is included in (i) to (iii) of 1. (a), and that the accelerated examination is requested under the PPH pilot program. The application number, publication number, or a patent number of the corresponding NOIP application(s) also must be written.

*In the case that the application which has one or more claims that are determined to be patentable/allowable is different from the NOIP application(s) included in (i) to (iii) of 1. (a) (for example, the divisional application of the basic application), the application number, publication number, or a patent number of the application(s) which has claims determined to be patentable/allowable and the relationship between those applications also must be written.

(2) Documents to be submitted

The applicant must list the name of all required documents mentioned above 2. even when applicant omits to submit certain documents.

(3) Notice

Forms of “The Explanation of Circumstances Concerning Accelerated Examination” are different between on-line procedure and paper procedure. Please refer to the examples of forms when filling in (“Form 1 for Accelerated Examination” for on-line procedures, and “Form 2 for Accelerated Examination” for paper procedures.).

4. Procedure for the accelerated examination under the PPH pilot program

³ http://www.jpo.go.jp/torikumi/t_torikumi/souki/pdf/v3souki/guideline.pdf

JPO decides whether the application can be entitled to the status for an accelerated examination under the PPH when it receives a request with the documents stated above. When JPO decides that the request is acceptable, the application is assigned a special status for an accelerated examination under the PPH.

In those instances where the request does not meet all the requirements set forth above, the applicant will be notified and the defects in the request will be identified. Before the issue of the notification of not assigning a special status for accelerated examination under the PPH, the applicant will be given opportunity to submit missing documents. Even after the issue of the notification of not assigning a special status for accelerated examination under the PPH, the applicant can request the PPH again.

Example form of on-line procedures

(Example of the request based on the claims indicated patentable/allowable in the written opinion of the report on the state of the art)

<p>【書類名】 早期審査に関する事情説明書 ----- The name of this paper</p>
